Declaración (8 de octubre de 2026)

¡El Pentágono de EE. UU. autoriza el uso de armas nucleares de baja potencia en el campo de batalla ! (*)

Se trata de una noticia **extremadamente alarmante**, ya que supone la apertura de la « **caja de Pandora nuclear** »: de hecho, dicho uso rompería para siempre el « **tabú nuclear** » que - por imperfecto que sea - ha contribuido a protegernos del apocalipsis nuclear.

Si bien es cierto que Rusia, y quizás China, también han desarrollado armas nucleares de « **potencia relativamente baja** », EE. UU. ha ido un paso más allá al normalizar su posible uso mediante **su inclusión en la estrategia oficial** - concretamente, al contemplar su despliegue **en el campo de batalla** durante un **conflicto regional**, **incluso cuando los intereses vitales de USA no se vean necesariamente amenazados** -.

En este contexto, también cabe señalar que Estados Unidos ha desarrollado la nueva bomba **nuclear B61-12**: un arma estratégica «antibúnker» **con una potencia variable** que puede **reducirse hasta tan solo 0,3 kilotones** - una quincuagésima parte de la potencia de la bomba de Hiroshima, **pero treinta veces superior** a la de la bomba convencional más grande -.

Esta capacidad **podría tentar a Donald Trump** a utilizarlas **contra búnkeres muy profundos en Irán.**

Cabe destacar que ya hay **más de un centenar** de estas bombas **B61-12** estacionadas en bases de la OTAN en Italia, Bélgica, Alemania, los Países Bajos y Turquía.

En conclusión, se trata de un grave acontecimiento destinado a borrar la enorme brecha entre las armas convencionales y las nucleares, incluso **a nivel doctrinal**.

Las personas que defienden el desarme nuclear **deben alertar a la comunidad internacional sobre este grave riesgo al que se enfrenta la Humanidad.**

(*) Aquí añadimos **tres fuentes**:

1.- The Arms Control Association, 24 de agosto de 2026 (extractos):

*« **US apostará por la guerra nuclear limitada en sus nuevas directrices***

El Pentágono** está planificando **revisiones de las directrices de uso nuclear de US** que harán **hincapié en el papel de las armas nucleares tácticas y en las opciones de uso limitado, …

Los cambios supondrían un giro radical hacia la aceptación de la guerra nuclear a nivel táctico …

***El 5 de agosto, NBC News** dio a conocer **más detalles** sobre la Revisión de la Estrategia Nuclear que guía este cambio de política.*

*« **Queremos poder ofrecer al presidente y al secretario opciones nucleares creíbles y racionales** », declaró **el subsecretario de Defensa para Política, Elbridge Colby**, a los asistentes a la conferencia de Omaha **el 5 de agosto**.*

*En sus comentarios, **Colby** abogó **por opciones nucleares limitadas** que sean proporcionales a los intereses limitados de US en las crisis regionales. ... »*

***2.- Artículo en "Le Canard Enchaîné, 2 de septiembre de 2026** :*

*«**Washington quiere armas nucleares a medida» – «Les États-Unis veulent des armes nucléaires sur mesure**» (página 3)*

3.- Artículo en el Bulletin of the Atomic Scientists, 14 de septiembre de 2026 :

*« **El plan secreto del Pentágono: revivir las doctrinas de la Guerra Fría para rebajar el umbral de la guerra nuclear** »*
